

# Shark Rocket HV301 Rotary Brush Replacement

This guide will teach you how to remove and replace the rotary brush on the Shark Rocket HV301.

Written By: Jonathan Baruch

## TOOLS:

- [iFixit Opening Tools](#) (1)
  - [Phillips #2 Screwdriver](#) (1)
-

## Step 1 — Rotary Brush

- Flip vacuum so the bottom base is visible.
- Gently pry bottom two wheels off with a plastic opening tool.

## Step 2

- Remove five visible screws with a Phillips #2 screwdriver.
- Locate and twist the three plastic screws to the unlock position with a quarter or flathead screwdriver.

### Step 3

- Remove plate covering the roller brush.

### Step 4

- Use a Phillips #2 screwdriver to extract the three screws revealed from removing the plate.

## Step 5

- Turn the vacuum over so the rotary brush is on the ground.
- Grab the vacuum on both sides of the hose and pull up to remove the top of the vacuum halfway.

## Step 6

- Gently pinch head of cable and pull upwards until casing disconnects from vacuum.
- Proceed with removing upper casing.

## Step 7

- Use a Phillips #2 screwdriver to remove the four visible screws securing the rotary brush to the vacuum.

## Step 8

- Locate rotary belt on right side of vacuum and remove from bearing.
- Gently lift casing to remove belt and brush from vacuum.

## Step 9

- Gently pry off plastic casings on both sides of rotary brush.
- Lift clear plastic shell from rotary brush.

## Step 10

- Remove rotary belt attached to brush and replace if needed.

To reassemble your device, follow these instructions in reverse order.
